Lead content of products

Dear Sir or Madam,

Under article 33 of the REACH regulation, we are obligated, as the manufacturer of the products, to inform you if and when a delivered product contains a substance from the SVHC candidate list (<https://echa.europa.eu/de/candidate-list-table>) with a concentration of more than 0.1 %.

The obligation to inform also applies to partial products as they fulfil the definition of a product.

Lead is included in the SVHC candidate list since 27 June 2018.

For this reason, we would like to inform you that our products may contain lead at a concentration above 0.1 %. Therefore, we kindly request you to take note of this. In every single case, lead is being referred to as an alloy component in raw materials (steel, non-ferrous metals).

Lead = CAS number: 7439-92-1
EG number: 231-100-4

If there are any changes to the current standings arising from an update of the SVHC candidate list by the ECHA, we will continue to fulfil our obligations under the REACH Regulations, which include the duty to inform.

Please do not hesitate to contact us if you have any questions.

Yours sincerely,
Woelm GmbH
